

## **MEF EMC-FILTER 3-PHASE 1-STAGE**

I:110A U:3x600 VAC book-style

Art.No.: 10538 Weight: 3.2 Country of origin: IT Model designation: MEF 3/1 110A T

Current: 110 A 1-stage Attenuation curves on request.

The MEF 3/1-3/2 3-phase and 1-/2-stage mains suppression filters are used in the 0.1...30 MHz range to suppress conducted interference on mains and supply lines. They are suitable for TN-C networks. The best filter effect is achieved with short connecting lines (recommendation: PE connection < 10 cm) with the largest possible cross sections. Line suppression filters act bidirectionally (in both directions). They reduce symmetrical and asymmetrical interference, which often occurs with frequency converters and switched-mode power supplies.
