Important installation notes	
•	District the connectors by a stable assessment from machinical leads on by the connector of solile time
Note on strain relief	Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties.
	Assertion Observe the remarkable handing and in the leading and the ID contesting place and he
Note on bending radius	Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be endangered by excessive bending forces.
